03 Dark Grey	6.48
02 Medium Grey	18.06
04 Ice	51.74
01 White	85.07

Light Reflectance Value (LRV) is a scale that determines the quantity of visible and usable light reflected by all directions and all wavelengths when a surface is illuminated. It is measured from 0% which reflects no visible light to 100% which reflects all light. Please note that the light reflectance values provided are averages as dark or light areas in some colorways may vary as much as 30%.
