

Wing

Acoustic Ceiling Panel

Wing lets sound absorption take flight.

Wing takes flight to provide playful sound absorption overhead. Beautiful both as a single object or as a flock, this gracefully curved acoustic panel provides an impressive Noise Reduction Coefficient rating of 0.65. The light grey acoustic substrate pairs with your choice of over ninety wool felt colors to make a suspended acoustic panel that is anything but ordinary.

Wing was designed by Kerstin Heyroth + Ralf Kürbitz for Cabs Design as part of a project at University of Applied Sciences Mainz in Germany.

Maintenance	Vacuum occasionally to remove general air-borne debris. Should soiling occur, spot clean with mild soap and lukewarm water. Avoid aggressive rubbing as this can continue the felting process and change the surface appearance of the felt. Refer to 100% Wool Design Felt Maintenance + Cleaning for detailed care instructions.
Variation	Wool felt is a natural material and color variation and inclusions of natural fiber on the surface are evidence of the 100% natural origin of the material. Product color is only indicative, as it is not possible to assure consistency of color in a natural product due to the natural color of raw wool and absorption of dyes. Color matching cannot be guaranteed between individual panels and expect color variation beyond the normal commercial range.
