

ARO Grid 1

Acoustic Ceiling System

fílfelt •

ARO Grid 1 amps up
the geometry of your
average ceiling grid.

This acoustic ceiling system based on the play of intersections keeps things regular with two planes intersecting at right angles. The angles of ARO Grid 1 activate the ceiling with light and shadow, allowing the ceiling grid to quietly disappear. Play with colors, custom heights, and other ARO Grid designs to create a unique landscape of sound softening pattern across the ceiling.

ARO Grid was designed by Architecture Research Office (ARO), a New York based firm dedicated to architecture that unites beauty and form with strategy and intelligence.

"We strive to convey a sense of calm, warmth, and joy in our product designs as well as through the architecture we design. We take inspiration from both material expression and functionality. We work to elevate spaces through careful attention to detail and use, and to emphasize the responsible use of materials and seek to balance beauty and strategy through design, pattern and texture."

– Architecture Research Office, designers of ARO Grid 1
