

A modern interior space featuring a dark grey, geometric, 3D acoustic ceiling grid (ARO Grid 6) with a repeating cube-like pattern. The room has large windows with gold-colored frames, offering a view of a red brick building with arched windows. In the foreground, there are two grey armchairs, a small round wooden table with books, and a spherical pendant lamp with vertical ribbing. The overall aesthetic is minimalist and contemporary.

## ARO Grid 6 takes acoustic tile to the next level.

ARO Grid 6 takes the traditional grid pattern and plays it up a bit. Available in two standard sizes and three standard colorways, combine custom heights and colorways to delineate space, define corridors, or create an eye-catching aesthetic that plays with light and shadow. The design's distinctive cross-hatching patterning adds visual interest overhead without the need for additional hardware and works overtime to keep the volume down.

ARO Grid 6 was designed by Architecture Research Office (ARO), a New York based firm dedicated to architecture that unites beauty and form with strategy and intelligence.

"We strive to convey a sense of calm, warmth, and joy in our product designs as well as through the architecture we design. We take inspiration from both material expression and functionality. We work to elevate spaces through careful attention to detail and use, and to emphasize the responsible use of materials and seek to balance beauty and strategy through design, pattern and texture."
