Installation	Due to the unique characteristics of wool and nonwoven textiles, care must be taken to properly install and maintain a wool felt floor covering. Refer to Floor Covering Installation + Maintenance Instructions for complete guidance.
Maintenance	Vacuum occasionally to remove general air-borne debris. Please note that slight shedding of wool fibers is normal and not indicative of any defect. These loosened fibers are easily vacuumed away and will decrease over time. If a wet spill should occur, blot up the liquid as soon as possible with a dry cloth to avoid absorption. Avoid aggressive rubbing as this can continue the felting process and change the surface appearance of the felt. For removal of minor stains, if the floor covering can be removed it is best to obtain the services of a professional dry cleaning company that is familiar with the special care of wool. Refer to Floor Covering Installation + Maintenance for detailed care instructions.
Variation	Wool felt is a natural material and color variation and inclusions of natural fiber on the surface are evidence of the 100% natural origin of the material. Product color is only indicative, as it is not possible to assure consistency of color in a natural product due to the natural color of raw wool and absorption of dyes. Color matching cannot be guaranteed on shipments and variation will be more pronounced beyond the normal commercial range. FilzFelt floor coverings are made from natural materials and may incorporate hand craftsmanship. Therefore slight irregularity may occur and sizes can vary and change up to ±5%.
