

Hanging Panel Track System

Hardware

filzfelt •

Hanging Panel Track System keeps it on the down low.

The Hanging Panel Track System lets the panels do the talking. Minimal and contemporary, the linear system has a thin, unobtrusive aluminum profile and carriers are whisper quiet and slide smoothly. Choose from options that include multiple channels, ceiling mounted, wall mounted, or cable suspended, stationary or sliding panels, plus velcro or grommet panel attachment for easy hanging and removal for cleaning. Tracks come in custom length and are delivered assembled and ready to install.
