Photographer	Peter Dressel

For their design studio in Brooklyn, New York, CO Adaptive Architecture applies a variety of sound-absorbing products, all in pure wool felts. In the open office, Akustika 25 Baffles hang in a beautifully subtle gradation of natural white wools across the ceiling. And in a conference room, custom Akustika 10 Wall panels in a soft grey are sized to fit the room's unique angles and architecture.

For more information on the products featured, please visit filzfelt.com/akustika-25-baffle and filzfelt.com/akustika-10-wall.
