Project Profile

filzfelt •

Davis Loft

Specifier	studiodb
Location	New York NY
Product	CNC cut Wool Design Felt
Felt Color	150 Weiß

Easy loft living is the design theme for this 3,200 square foot loft in the Tribeca section of Manhattan designed by studiodb. An open plan allows light to penetrate the entire apartment and utilizes a bright, neutral color story, even in the children's bedrooms. These playful spaces integrate sleeping lofts where undyed 100% Wool Design Felt in 150 Weiß is installed at the wooden railings to create a tactile, minimal railing system. The felt pieces are CNC cut with lighthearted circle and star-shaped patterns and holes for hardware were pre-cut for easy installation.
