Photographer	Bob O'Connor

Custom acoustic tiles create graphic acoustic absorption in the children's bedroom of this modern residence in the South End of Boston. Custom Triangle 60 Block tiles are arranged in a custom pattern that gradates from dark to light with bits of 116 Orange and 274 Senf interspersed. The modular, acoustic tiles provide needed sound absorption on the wall shared with the living room of a young (and sometimes a little boisterous) family allowing naps to take place at the same time as Sesame Street.
