Bold colors and simple geometries are prominent at the new 53,000 square foot offices of SquareTrade, an extended warranty service provider for smart phones and electronics. The monochromatic color scheme at the circulation spaces contrasts adjacent rooms, where bright hues differentiate the various office functions. The room interiors feature nine colors of 100% Wool Design Felt wallcovering creating striking pops of color through glazing and doorways. Elsewhere, the 'central hive' features large booths with the acoustic finish of 100% Wool Design Felt in a soft, natural grey to facilitate private work as well as impromptu meetings.
